

PROJECT 2025

THE RIGHT'S ROAD
TO A DICTATORSHIP

DISMANTLING HEALTH & HUMAN SERVICES —————→

GOAL #1: PROTECTING LIFE, CONSCIENCE, AND BODILY INTEGRITY

- The secretary should pursue a robust agenda to protect the fundamental right to life, protect conscience rights, and uphold bodily integrity, rooted in biological realities, not ideology.
- Abortion and euthanasia are not healthcare.
- Radical actors inside, and outside of the government are promoting harmful identity politics that replaces biological sex with subjective notions of gender identity. This is a destructive dogma.
- This destructive dogma in the guise of equity threatens America's fundamental liberties as well as the health and well-being of children and adults alike.
- The next secretary must ensure that HHS programs, protect children's minds and bodies, and that HHS programs respect parents basic right to direct the upbringing, education, and care of their children.

GOAL #2: EMPOWERING PATIENT CHOICES, AND PROVIDER AUTONOMY

- Healthcare reform should be patient centered and market-based and should empower individuals to control their healthcare related dollars and decisions.
- Providers who deliver healthcare, also need the freedom to address that unique needs of their patients. States should be the primary regulators of the medical profession, and the federal government should not restrict providers ability to discharge their responsibilities or limit their ability to innovate through government pricing controls, or irrational, Medicare and Medicaid reimbursement schemes.
- Americans broken insurance system, run largely through confusing provider networks and third-party pairs, and it induces the over consumption of healthcare and limits consumer shopping and hides true costs from patients. The federal government should focus reform on reducing burdens of regulatory compliance, unleashing innovation, and healthcare delivery, ceasing interference in the daily lives of patients and providers, allowing alternative insurance, coverage, options, and returning control of healthcare, dollars to patients making decisions and → their providers.

GOAL #3: PROMOTING STABLE AND FLOURISHING, MARRIED FAMILIES

- Families, compromised of a married mother, father, and their children, other foundation of a well ordered nation and healthy society. Unfortunately, family policies and programs under President Biden's HHS are fraught with a agenda items focusing on LGBTQ equity, subsidizing, single motherhood, disincentivizing, work, and penalizing marriage. These policies should be repealed and replaced by policies that support the formation of stable, married, nuclear families.

GOAL #3: PROMOTING STABLE AND FLOURISHING, MARRIED FAMILIES

Working fathers are essential to the well-being and development of their children but the United States is experiencing a crisis of fatherlessness that is ruining our children's futures. Fathers are the ones that insulate children from physical and sexual abuse, financial difficulty, or poverty, incarceration, teen pregnancy, poor educational outcomes, high school failure, and a host of behavioral and psychological problems. By contrast homes with non-related boyfriends present are among the most dangerous place for a child to be. HHS should prioritize, married, father engagement, and its messaging, health, and welfare policies.

GOAL #3: PROMOTING STABLE AND FLOURISHING, MARRIED FAMILIES

In the context of current and emerging reproductive technologies, HHS policy should never place the desire of adults over the right of children to be raised by the biological fathers and mothers, who conceived them. In cases involving biological parents, who are found by a court to be unfit because of abuse or neglect The process of adoption should be speedy, certain, and supported generously by HHS.

Note: this is basically saying that gay people should not be able to adopt or use surrogacy or in vitro fertilization.

GOAL #4: PREPARING FOR THE NEXT HEALTH EMERGENCY

- The COVID-19 pandemic demonstrated how catastrophic a micromanaging, misinformed, centralized, and politicized federal government can be. Basic human rights, medical choice, and Dr. patient relationship were trampled without scientific justification, and for extended periods of time. Access deaths, not due to COVID-19 skyrocketed, because of forced lockdowns, isolation, vaccine related, masses, and colossal disruptions of the economy and daily rhythms of life.
- The federal government public health apparatus has lost the public trust.
- Before the next public health epidemic, this apparatus must be fundamentally restructured to ensure a transparent, scientifically, grounded, more nimble, efficient, transparent, and targeted response that respects the unique needs an input of patient populations and providers.

GOAL #4: PREPARING FOR THE NEXT HEALTH EMERGENCY

- Every one of the overreaching policies during the pandemic, from lockdowns and school closures to mask and vaccine, mandates or passports, received its supposed legal justification from the state of emergency declared by the HHS secretary.
- Unaccountable bureaucrats like Anthony Fauci should never again have such broad unchecked power to issue health guidelines that will certainly be the basis for federal and state mandates. The only way to restore public health trust, and HHS, as an institution capable of acting responsibly during a health emergency is through the best of disinfectants, light.

GOAL #5: INSTITUTING GREATER TRANSPARENCY, ACCOUNTABILITY, AND OVERSIGHT

- The next administration should guard against the regulatory capture of our public health agencies by pharmaceutical companies, insurers, kinda hospital, conglomerates, and related economic interest that these agencies are meant to regulate.
- All national Institute of health, center for disease, control and prevention, food and drug administration.
- Regulators should be entirely free from private bio pharmaceutical funding. And this real public private partnerships is a euphemism for agency capture, a thin veneer for corporatism.
